# **WATER LEAK**

## **(INVOLVING CEILING)**

### **FACILITIES SERVICES**

In the event of a water leak that involves ceiling material, immediate action is required to determine if the ceiling is asbestos containing material.

### **PROCEDURE**

1. Determine if ceiling is on the Asbestos Containing Ceiling List.
2. If you are not sure notify Environmental Health and Safety at 309-438-8325 (during off hours contact the on-call safety officer via ISUPD at 309-438-8631).

## **NON-ASBESTOS CONTAINING CEILING**

### **Notify the following individuals:**

1. Facilities Services Work Management 309-438-5656.
2. Heating Plant 309-438-5516.
3. If the leak is considered a major water leak notify the on-call Safety Officer.
  - a. A major water leak is defined as leaks that could be caused by a roof leak, plumbing pipe, sprinkler system failure, and/or heating and cooling systems in which water floods one or more rooms. A major water leak is water leaking out of multiple electrical fixtures; damaging ceilings, furnishings and/or equipment in the rooms.

## **ASBESTOS CONTAINING CEILING**

### **Notify the following individuals:**

1. Facilities Services Work Management 309-438-5656.
2. Heating Plant 309-438-5516.
3. Environmental Health and Safety at 309-438-8325 (during off hours contact the on-call safety officer via ISUPD at 309-438-8631).

### **Procedure:**

1. Do not enter room.
2. Turn off water (remotely, even if you need to shut down all of building).
3. Secure room if possible.
4. Cordon off area with "Danger – Do Not Enter/Authorized Personnel Only" signage.
5. Building occupants should be notified of water outage and appropriate signage installed.
